TS5.225SA

## Construction Products Regulation 2011 DECLARATION OF PERFORMANCE

## DoP No. BDC5225SA

1. Unique identification code of the product-type: **Controlled door closing device** 

2. Type, batch or serial number or any other element allowing identification of the construction product as required under Article 11(4) of the CPR: **TS5.225SA** 

3. Intended use or uses of the construction product, in accordance with the applicable harmonised technical specification, as foreseen by the manufacturer:

For use on fire and smoke compartmentation doors, when fitted in accordance with the manufacturer's fitting instructions.

4. Name, registered trade name or registered trade mark and contact address of the manufacturer as required under Article 11(5):

Boss Door Controls Limited, 3 & 4 Rutherford Square,
Brucefield Industrial Park, Livingston, West Lothian
EH54 9BU, United Kingdom
5. Where applicable, name and contact address of the authorised representative whose mandate covers the tasks specified in Article 12(2):

N/A

6. System or systems of assessment and verification of constancy of performance of the construction product as set out in CPR, Annex V: **System 1** 

7. In case of the declaration of performance concerning a construction product covered by a harmonised standard. **EN 1154: 1996: A1: 2002** 

Notified product certification body No. 2812 performed the type testing and issued test reports.

8. European Technical Assessment: N/A

| 9. Declared Performance – Figure 1<br>Essential characteristic Performance Harmonised technica |  |                     |
|--|--|---------------------|
| Self closing   | renormance   | specification       |
| 5.2.1 General  |  | EN1154:1996:A1:2002 |
|  | Deer mounted null side (Fig. 1)                          | EN1154.1990.A1.2002 |
| Application  | Door-mounted pull side (Fig.1)                           |                     |
| 5.2.2 Durability   | 500,000 test cycles                                      |                     |
| 5.2.3 Closing moment   | Pass size 2 - 4  |                     |
| 5.2.4 Opening moment   | Pass size 2 - 4  |                     |
| 5.2.5 Efficiency;  | More than 50% size 2                                     |                     |
|  | More than 55% size 3                                     |                     |
|  | More than 60% size 4                                     |                     |
| 5.2.6 Closing time   | Pass- After 5K and 500K test cycles, the                 |                     |
|  | closing time from an opening angle of 90° was            |                     |
|  | capable of adjustment to 3 s or less, and 20 s or        |                     |
|  | more- After 500K test cycles, the closing time set at    |                     |
|  | 5K test cycles did not increase by more than 100%,       |                     |
|  | or decrease by more                                      |                     |
|  | than 30%.  |                     |
| 5.2.7 Angles of operation  | Grade 3, 105°  |                     |
| 5.2.8 Overload performance   | Pass - The closer withstood the closing                  |                     |
|  | overload tests   |                     |
| 5.2.9 Temperature  | -15°C to +40°C   |                     |
| dependence   |  |                     |
| 5.2.10 Fluid leakage   | Pass - There was no leakage of fluid from the            |                     |
|  | closer   |                     |
| 5.2.11 Damage  | Pass - There was no damage to the door                   |                     |
|  | closing device that would adversely affect its           |                     |
|  | performance to the standard                              |                     |
| 5.2.12 Latch control   | Pass - Effective over max. range of 15 <sup>o</sup> from |                     |
|  | closed position, and adjustable                          |                     |
| 5.2.13 Backcheck   | N/A  |                     |
| 5.2.14 Delayed closing   | N/A  |                     |
| 5.2.15 Adjustable closing  | Pass   |                     |
| force  |  |                     |
| 5.2.16 Zero position (Double   | N/A  |                     |
| action only)   |  |                     |
| 5.2.18 Fire / smoke doors  | Grade 1: Suitable for use on fire/smoke door             |                     |
|  | assemblies   |                     |
| 5.2.2 Durability   | Grade 8 500,000 test cycles                              |                     |
| 5.2.17.1 Corrosion   | Grade 3 : 96 hrs   |                     |
| 5.2.17.2 Corrosion   | Pass - After the salt spray test, the closing            |                     |
|  | moment of the door closer was not less than 80% of       |                     |
|  | that measured prior to the test.                         |                     |
| Dangerous Substances   | The materials in the product do not contain or           |                     |
| Annex ZA3  | release any dangerous substances in excess of the        |                     |
|  | maximum levels specified in existing European            |                     |
|  | material standards or any national regulations.          |                     |
|  |  |                     |

| 5.2.6 Closing time                  | Pass- After 5K and 500K test cycles, the                 |                      |  |
|                                     | closing time from an opening angle of 90° was            |                      |  |
|                                     | capable of adjustment to 3 s or less, and 20 s or        |                      |  |
|                                     | more- After 500K test cycles, the closing time set at    |                      |  |
|                                     | 5K test cycles did not increase by more than 100%,       |                      |  |
|                                     | or decrease by more                                      |                      |  |
|                                     | than 30%.  |                      |  |
| 5.2.7 Angles of operation           | Grade 3, 105°  |                      |  |
| 5.2.8 Overload performance          | Pass - The closer withstood the closing                  |                      |  |
|                                     | overload tests   |                      |  |
| 5.2.9 Temperature                   | -15°C to +40°C   |                      |  |
| dependence                          |  |                      |  |
| 5.2.10 Fluid leakage                | Pass - There was no leakage of fluid from the            |                      |  |
|                                     | closer   |                      |  |
| 5.2.11 Damage                       | Pass - There was no damage to the door                   |                      |  |
|                                     | closing device that would adversely affect its           |                      |  |
|                                     | performance to the standard                              |                      |  |
| 5.2.12 Latch control                | Pass - Effective over max. range of 15 <sup>o</sup> from |                      |  |
|                                     | closed position, and adjustable                          |                      |  |
| 5.2.13 Backcheck                    | N/A  |                      |  |
| 5.2.14 Delayed closing              | N/A  |                      |  |
| 5.2.15 Adjustable closing           | Pass   |                      |  |
| force                               |  |                      |  |
|                                     |  |                      |  |
| 5.2.16 Zero position (Double        | N/A  |                      |  |
| action only)                        |  |                      |  |
| 5.2.18 Fire / smoke doors           | Grade 1: Suitable for use on fire/smoke door             |                      |  |
|                                     | assemblies   |                      |  |
| 5.2.2 Durability                    | Grade 8 500,000 test cycles                              |                      |  |
| 5.2.17.1 Corrosion                  | Grade 3 : 96 hrs   |                      |  |
| 5.2.17.2 Corrosion                  | Pass - After the salt spray test, the closing            |                      |  |
|                                     | moment of the door closer was not less than 80% of       |                      |  |
|                                     | that measured prior to the test.                         |                      |  |
| Dangerous Substances                | The materials in the product do not contain or           |                      |  |
| Annex ZA3                           | release any dangerous substances in excess of the        |                      |  |
|                                     | maximum levels specified in existing European            |                      |  |
|                                     | material standards or any national regulations.          |                      |  |

9. Declared Performance – Figure 61

10. The performance of the product identified in points 1 and 2 is in conformity with the declared performance in point 9.

This declaration of performance is issued under the sole responsibility of the manufacturer identified in point 4. Signed for and on behalf of the manufacturer by:
